9. At-Tawba : 129

Ayah text

بَرَآءَةٌ مِّنَ ٱللَّهِ وَرَسُولِهِۦٓ إِلَى ٱلَّذِينَ عَٰهَدتُّم مِّنَ ٱلْمُشْرِكِينَ

Translation text if activated

هذه براءة من الله ورسوله، وإعلان بالتخلي عن العهود التي كانت بين المسلمين والمشركين.

If you have been using this app since previous versions you will notice that repetition settings and also reciter choice is not displayed directly in this page. Don't worry, you can access it by tapping 'settings' button (circle -

colored) on the left side of the navigator. It will show a dialog below the screen like this :

Select reciter — Abdurrahmaan As-Sudais

Set each ayah repetition — 1 x each ayah

Set each ayah repetition with its previous ayah — 0 x with previous ayah

Set range repetition — 1 x range

Save settings ✓

In the past, audio player has 2 mode (manual and auto mode). Now, it is only auto mode exists. So, if you want to memorize a single ayah, you can set last ayah in range the same as the first.

Each ayah repetition will be the first repetition being executed. Then 'with previous ayah' repetition after that. For example, if you set the range is from **1 to 75** with **3x each ayah repetition**, **1x with previous ayah repetition**, and **2x range repetition**, then the audio will play **1st ayah 3 times**, then **2nd ayah 3 times**, then **1st and 2nd ayah once**, then **3rd ayah 3 times**, then **2nd and 3rd ayah once**, and so on until 75th ayah. Then it will **replay that sequence once again**.

Add Progress Record

Here you can add what you have memorized to the record. Progress record displayed in Memorize page.

Add Progress Record

Add your previously memorized ayat here

From surah ▾ 1 — set first surah you want to mark as memorized — set first ayah of first surah you want to mark as memorized

To surah ▾ ayah — set last surah you want to mark as memorized — set last ayah of last surah you want to mark as memorized

For example if want to mark surah Al-Kahf, Maryam, and Taa-haa as memorized, then you should input like the picture below. 135 is the last ayah of surah Taa-haa.

MARK AS MEMORIZED

When you set last surah, last ayah will be set automatically as the last ayah of that surah. You can change it manually if needed. When all set correctly you can just tap on 'MARK AS MEMORIZED' to proceed.

Search

Search any ayah or piece of it or translation here. You can input arabic text with harakat / sign or without it to search in ayah. It will only search on downloaded translations. You need to download it manually in Settings page.

Review

Here you can review your memorizing by recording your voice reciting a specific range of ayah, then replay it while marking on which ayah you have been incorrect. This process is nearly the same as the process for adding specific range of ayah as memorized.

From surah ▾	Al-Kahf ▾
To surah ▾	Taa-Haa ▾
	START
	Level
	Select test level
	ADVANCED BASIC

Basic means that question type will be about previous or next ayah of the given ayah. Advanced means that the questing will also ask ayah position in which surah and its sequence in it.

Just like the Review page, you can see previous test result below those inputs. However in case of test, you cannot review the past test anymore.
